Magnetic ground clamps

Magnetic ground clamps are extremely useful tools to produce quickly and flexibly the grounding to the welding machine with a switch rotation, without searching suitable clamping locations for the welding clamp.

Features:

- ✔ Extremely fast connection of the welding ground
- ✔ Attachment to flat and rounded surfaces, like tubes
- ✔ Safe connection of the welding ground with one switch rotation
- ✔ Stay clean. Turn off ground clamp and wipe away debris
- ✔ Stable attachment of the welding ground
- ✔ No deformation of the surface
